"For me, I wouldn't mind if every year's city festival should debut with the American Spiritual Ensemble in the Reina Sofia Park. The concert on Tuesday was an authentic feast of the multicolored voices and the very rich music of the American Spirituals. It is truly an authentic joy to see how a group, so multiethnic and with so much vocal richness is capable of melding together and unite in something so universal like music and transmit that feeling of internal happiness and community to an audience so heterogeneous like the one of the other day." - *José Manuel Piña, **Diario de Ibiza**, Spain*

"The prodigious voices of the North American group the American Spiritual Ensemble made the audience tremble with emotions this past Sunday at the plaza of Santa Maria la Real, of Najera... The forcefulness and sheer power of the voices and the impressive timbre and sounds were almost too much to imagine. They created a warm ambiance and the audience surrendered with applause." ***La Rioja** - Logroño, Spain*
